Smid Cap Dividend Growth Fund

- **Benchmark:** Russell 2500® Index
- **Inception:** February 26, 2017*
- **Description:** Focused on companies with market capitalizations below \$15 billion at purchase that have demonstrated consistent year over year dividend growth. Any stock that pays a dividend that, in our opinion, has strong prospects for dividend growth, qualifies for purchase.

*Copeland has run the strategy as a separate account since September 30, 2013

Smid Cap Dividend Growth Universe

The information presented is intended to illustrate the performance of Smid Cap stocks according to their dividend policy. Returns shown include dividends reinvested. This is not the performance of any strategy overseen by Copeland and there is no guarantee that investors will experience the type of performance reflected in the information presented. Strategies managed by Copeland's investment team are subject to transaction costs, management fees, trading fees or other expenses not represented in the information presented. There is no guarantee that companies will declare dividends or, if declared, that they will remain at current levels or increase over time. Ned Davis Research adjusted the universe used for the domestic study as of December 31, 2017, from the Ned Davis Investable Universe to a universe based on the applicable Russell benchmarks. Dividend Growers included stocks that raised their existing dividend or initiated a new dividend during the previous 12 months. Flat Dividend Payers included stocks that pay a dividend but have not raised or lowered their existing dividend during the previous 12 months. Non Dividend Payers included stocks that have not paid a dividend during the previous 12 months. Dividend Cutters included stocks that lowered their existing dividend or eliminated their dividend during the previous 12 months. You cannot invest directly in an Index. For information on the Index shown above as well as other important information, please refer to the additional disclosures on the back page.

Investment Process – Ranking Model

“We believe that stocks with sustainable dividend growth consistently outperform the market with less risk.”

Dividend Growth defines our universe, drives our total return solution and is the centerpiece of our research process.

Dividend Growth stocks are ranked using a proprietary fundamental ranking system in an effort to establish each specific company's ability to grow its dividends in the future.

Factors we have found to be predictive of strong Dividend Growth and total return include:

- Dividend Coverage
- Free Cash Flow Generation
- Growth in the Underlying Business
- Return on Capital

Top-ranked stocks within the model are subject to deep fundamental analysis.

Investment Process - Fundamental

Copeland's research process is designed to identify companies with strong competitive positions that support steadily rising dividends.

Competitive Advantage: Low cost vs. differentiation strategies; scale, market share, pricing power, network effects, brands; high ROIC

Management's allocation of free cash flow:

- Reinvest to defend and enhance competitive position, promote growth
- Distribute to stakeholders: rising dividends, buybacks, pay down debt

Assess the sustainability and pace of future Dividend Growth:

- Evaluate the success of reinvestment efforts: Consistency of ROIC
- Dividend coverage ratios; Business growth prospects; Management's commitment to future dividend increases

Valuation: Dividend yield relative to dividend growth projection, cash flow multiples, P/E's, etc.

Total return = Dividend yield + dividend growth +/- valuation change

The Dividend Guides Us: Dividend Growth defines our universe, supports our total return solution, and is the centerpiece of our research process.

Sell Discipline

Stocks are sold for the following reasons:

- **Dividend Cut or Failure to Raise:** Any holding that cuts or even fails to raise its dividend is sold – No Exceptions!
- **Deterioration of Dividend Quality:** Portfolio candidates must meet minimum thresholds of cash flows and earnings supporting the dividend. Violations of these thresholds have been found to be predictive of a future dividend cut.
- **Low Quantitative Ranking:** Problems are often exhibited in the quantitative rankings when factors such as earnings momentum, cash flow or return on capital deteriorate. These are red flags for a detailed analyst review.
- **Fundamental Concerns:** Analysts are continuously questioning the competitive advantage of the company, as well as macro, regulatory or secular themes, with a focus on identifying risks to the dividend.

There is no guarantee that companies will declare dividends or, if declared, that they will remain at current levels or increase over time.

Mark Giovanniello – Chief Investment Officer, Portfolio Manager

Mr. Giovanniello is the Chief Investment Officer of Copeland Capital Management. Mark is a co-portfolio manager on all Domestic Strategies and the lead manager for the Mid Cap, Smid Cap, and Small Cap Strategies. He is responsible for research coverage of the Health Care, Materials and Energy sectors. Ned Davis Research Additional Disclosures— See NDR Disclaimer at www.ndr.com/copyright.html. For data vendor disclaimers refer to www.ndr.com/vendorinfo/. Ned Davis Research adjusted the universe used for the domestic study as of December 31, 2017, from the Ned Davis Investable Universe to a universe based on the applicable Russell benchmarks. As a result, historical performance information may differ from previously disseminated performance information for stocks according to their dividend policy. This is not the performance of the firm and there is no guarantee that investors will experience the same type of performance.

Alpha - a measure of the difference between actual returns and expected performance, given the level of risk as measured by beta, where beta measures sensitivity to index movements.

Dividend Yield - The company's total annual dividend payments divided by its market capitalization, or the dividend per share, divided by the price per share.

Price/Earnings-The Price-to-Earnings (P/E) Ratio of a stock is a measure of price paid for a share relative to annual net income or profit earned by the firm per share.

Price/Free Cash Flow—measure that compares company market price to its level of annual free cash flow per share.

Top 10 Holdings - The top ten holdings, industry sectors, and asset allocation are presented to illustrate examples of securities that the fund has bought and the diversity of areas in which the fund may invest, and may not be representative of the fund's current or future investments. Portfolio holdings are subject to change and should not be considered investment advice.

The **Russell 2500® Index** is comprised of the bottom 2500 companies in the Russell 3000® Index.

You cannot invest directly in an Index. Index returns are unmanaged and do not reflect any fees, expenses or sales charges.

Past performance is no guarantee of future results.

Risk Disclosure

Mutual Funds involve risk including possible loss of principal. The Fund may invest in MLP's. Holders of MLP units have limited control and voting rights on matters affecting the partnership. In addition, there are certain tax risks associated with an investment in MLP units and conflict of interest exist between common unit holders and the general partner, including those arising from incentive distribution payments. The Fund may invest in REIT's. A REIT's performance depends on the type and locations of the rental properties it owns and on how well it manages those properties. Real estate values rise and fall in response to a variety of factors, including local, regional, and national economic conditions, interest rates, and tax considerations. The adviser's judgments about the return tracking characteristics of securities may prove incorrect and may not produce the desired results. The Fund may invest in small and medium capitalization companies and the value of these company securities may be subject to more abrupt or erratic marketing movements than those of larger, more established companies or the market averages in general. A higher portfolio turnover will result in higher transactional and brokerage costs.

Copeland Capital Management and Northern Lights Distributors are not affiliated.
