

Copeland Funds Sector Update - February 2020

January began with a continuation of the 4th quarter's positive momentum in both US and foreign equities (Charts 1 and 2), but finished with a pullback in prices and a spike in volatility (Chart 3) with the emergence of the Coronavirus in China. The extent of the human and economic fallout from the rapidly spreading virus is a huge unknown variable as investors invest in early 2020. The outperformance of growth and defensive sectors, and underperformance of cyclical sectors, reflects the uncertainty that has enveloped global markets. The weakness in the energy and materials sectors reflects the determination by investors that industries dependent on Chinese demand will be significantly impacted. At Copeland we'll remain focused on the prospects for dividend growth in the companies in the portfolio, particularly within sectors of the market with positive sector signals. Both the domestic and international funds remain fully invested in equities in February, but with selective sector exposure as described more fully below.

The current bull market is now the longest since the Great Depression, reaching 130 months in length (Chart 4), even if it still ranks second in magnitude to the roaring 1990's. As always, there remains much to be concerned about, even beyond the virus, such as high valuation levels, little evidence of concern about the potential for future trade battles and a potentially game changing election in November. Still, there are also reasons to be optimistic. Economic data appears to be stabilizing for many economies around the world and the recent "industrial recession" may have run its course. Employment is high and improving and inflation is non-existent, while central banks have been supportive with monetary policy. The Funds are positioned to benefit in the near run if optimism continues, fully invested in high quality dividend growth stocks, but prepared to act tactically to raise cash if pessimism resumes and signs of weakness in the market do eventually unfold.

Copeland Risk Managed Dividend Growth Fund (CDGRX) ~

On a total return basis, the Fund returned +1.1% in January 2020, outperforming the S&P 500® Index which was flat. Stock selection in Industrials and Financials were the primary drivers of performance. The strategy was aided by an overweight in the positively ranked Utilities sector, which led the market this month with a +6.7% return. Also retaining a positive sector signal was the Technology sector, which continued its strong performance with a +3.9% month. The negatively ranked Materials and Energy sectors were the laggards this month, down 6% and 11% for the month, as they are expected to be most sensitive to the Chinese economic fallout from the rapidly spreading Coronavirus. Underweight positions to these sectors also aided performance.

The Health Care sector turned positive at the end of January resulting in additional positions being purchased for that sector. The positively ranked sectors are now Industrials, Technology, Health Care, Financials/REITs and Utilities where the strategy will retain overweight exposure vs. the benchmark. The four negatively rated sectors will be underweighted vs. the benchmark. With five sectors positive, the strategy will be 100% invested in dividend growth equities in February. The sector targets at present are approximately as follows: Technology (24%), Financials/REITs (22%), Industrials (16%), Health Care (16%), Utilities (7%), Consumer Staples (6%), Consumer Discretionary (5%), Energy (2%), Materials (1%) and Cash (0%).

Low volatility: due to the previous defensive sector positioning, cash levels

and ownership of dividend growth stocks, the strategy has produced less volatility over the last five years than the benchmark. During the trailing five year period as of 1/31/20, beta was only 0.5 and the strategy's standard deviation (volatility) was 8.7% vs. the S&P 500 Index at 11.9%.

Copeland International Risk Managed Dividend Growth Fund (IDVGX) ~

The Fund's -1.6% return outperformed the MSCI World ex USA Index, which was down -1.9% in January. The overweights to Technology and Utilities and stock selection in Industrials had positive impacts on return.

There were no sector changes at the end of January, with four sectors maintaining positive signals: Industrials, Technology, Staples, and Utilities. With four sectors positive, the strategy will continue to be 100% invested in dividend growth equities in February. The sector targets at present are approximately as follows: Industrials 22%, Staples 20%, Technology 14%, Utilities 14%, Financials/REITs 11%, Health Care 6%, Discretionary 6%, Energy 3%, Materials 4%, Cash 0%.

The Fund continues to have lower risk metrics vs. the benchmark for the trailing five year period, with a beta of 0.5 and standard deviation of 8.4% vs. 12.2% for the Index.

The maximum sales charge (load) for Class A is 5.75%. The performance data quoted here represents past performance. Current performance may be lower or higher than the performance data quoted above. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Past performance is no guarantee of future results. Total annual operating expense ratio for Class A shares is 1.82%. The Fund's adviser has contractually agreed to waive its fees and/or absorb expenses of the Fund, until at least March 31, 2020, to ensure that total annual fund operating expenses after fee waiver and/or expense reimbursement (exclusive of any taxes, leverage interest, borrowing interest, brokerage commissions, expenses incurred in connection with any merger or reorganization, dividend expense on securities sold short, acquired fund fees and expenses or extraordinary expenses such as litigation) will not exceed 1.45% of the daily average net asset value of Class A shares; subject to possible recoupment from the Fund in future years on a rolling three year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved without exceeding the lesser of the expense limitation in effect at the time of the deferral and at the time of the repayment. This agreement may be terminated by the Fund's Board of Trustees on 60 days' written notice to the adviser. Please review the Fund's prospectus for more detail on the expense waiver. Results shown reflect the waiver, without which the results could

have been lower. A Fund's performance, especially for very short periods of time, should not be the sole factor in making your investment decisions. You cannot invest directly in an index. For performance information current to the most recent month-end, please call toll-free 1-888-9-COPELAND.

The value of an investment in the Funds and the return on investment both will fluctuate and redemption proceeds may be higher or lower than an investor's original cost. Total return is calculated assuming reinvestment of all dividends. Total returns would have been lower had the Adviser, the Distributor, the Administrator, and Custodian not waived or reimbursed a portion of their fees. For performance numbers current to the most recent month-end please call 1-888-9-COPELAND.

Important Risk Disclosures

Investors should carefully consider the investment objectives, risks, charges and expenses of the Copeland Risk Managed Dividend Growth Fund and the Copeland International Risk Managed Dividend Growth Fund. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 1-888-9-COPELAND (1-888-926-7352). The prospectus should be read carefully before investing. The Copeland Risk Managed Dividend Growth Fund the Copeland International Risk Managed Dividend Growth Fund are distributed by Northern Lights Distributors, LLC member FINRA/SIPC. Copeland Capital Management, LLC and Northern Lights Distributors, LLC are not affiliated.

Mutual Funds involve risk including possible loss of principal. There is no assurance that the funds will achieve their investment objectives. There is no guarantee that companies will declare dividends or, if declared, that they will remain at current levels or increase over time. The Funds may invest in MLP's. Holders of MLP units have limited control and voting rights on matters affecting the partnership. In addition, there are certain tax risks associated with an investment in MLP units and conflicts of interest exist between common unit holders and the general partner, including those arising from incentive distribution payments. The Funds may invest in REIT's. A REIT's performance depends on the types and locations of the rental properties it owns and on how well it manages those properties. Real estate values rise and fall in response to a variety of factors, including local, regional and national economic conditions, interest rates and tax considerations.

The Funds may invest in small and medium capitalization companies and the value of these company securities may be subject to more abrupt or erratic market movements than those of larger, more established companies or the market averages in general. A higher portfolio turnover will result in higher transactional and brokerage costs.

Foreign Investing Risk: Investments in foreign countries are subject to country-specific risks such as political, diplomatic, regional conflicts, terrorism, war, social and economic instability and policies that have the effect of decreasing the value of foreign securities. Foreign investments may experience greater volatility than U.S. investments.

Index Disclosures - You cannot invest directly in an Index. *Indexes are unmanaged and do not account for any fees, commissions or other expenses that would be incurred. The portfolio*

characteristics of the indexes may differ from other providers due to the source of the data and differences in calculation methodology. Historical analytics are not indicative of future results.

*The **S&P 500® Index** consists of 500 stocks chosen for market size, liquidity and industry group representation. It is a market value weighted index with each stock's weight in the Index proportionate to its market value.*

*The **Russell 3000® Index** measures the performance of the 3000 largest U.S. companies based on total market capitalization, which represents approximately 98% of the investable U.S. equity market.*

*The **MSCI World ex USA® Index** captures large and mid cap representation across 22 of 23 Developed Markets (DM) countries--excluding the United States. With 1,020 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.*

***Beta** is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole.*

***Standard Deviation** is a measure of the variability of returns--the higher the standard deviation, the greater the range of performance (i.e., volatility).*

Returns for periods greater than one year are annualized.
